

# Modeling Plant & Animal Cells

## Cell Organelles

### Learning Target

Create a model of a basic plant and animal cell.

You will be creating a “mini” tri-fold poster that depicts the important organelles found in plant and animal cells. You will be given two periods in class to work on this poster, what is not finished in class will need to be completed outside of class. All projects are due on **FRIDAY, DECEMBER 5TH.**

### Front Requirements

- Half of an animal cell drawn with organelles (not labeled)
- Half of a plant cell drawn with organelles (not labeled)

### Inside Center Requirements

- All organelles that are found in both plant and animal cells.
- Functions of organelles.
- Drawing of each organelle.

### Inside Right Panel Requirements

- Organelles unique to plant cells.
- Functions of organelles.
- Drawing of each organelle.

### Inside Left Panel Requirements

- Organelles unique to animal cells.
- Functions of organelles.
- Drawing of each organelle.
