Test Recovery Plan
Biology 309-310

A test recovery plan provides an opportunity to re-master content from a unit and raise your test score. Test recovery is available for all tests except for the last unit test of each semester and final exams. Your new grade will be determined using an average of the original score and recovery score. Your recovery score will be recorded even in the event that it is lower than your original test score. Recovery assessments vary from unit to unit and will not necessarily involve retaking the original test. All steps of the recovery plan *and* the recovery assessment must be completed within <u>TWO WEEKS</u> of receiving the original test back.

STEP 1: Goal Setting

Original Score: _____   Goal Score: _____

What will you do differently in your preparation for the recovery test?

STEP 2: Remediation

☐ Print an assignment list from Skyward. Highlight missing assignments and attach the printout to this form.

☐ Complete missing assignments and attach to this form.

☐ Rewrite notes over missed learning targets (do not include these in your composition notebook).

☐ Complete the unit review guide and check your answers with the answer key.

☐ Complete test corrections. You may use any course materials, notes, labs, or textbook to complete your corrections but they must be completed in the testing center. See your teacher for a pass.

STEP 3: Recovery

Schedule a time to complete your test recovery upon completion of Steps 1-3. You will not receive a pass for your recovery assessment until all parts of this plan have been fulfilled. Keep in mind that you have a two week recovery deadline.

I understand that if I miss this test recovery date and time, I will not be allowed another opportunity to earn the test recovery points. I have also discussed my original test performance, score, and recovery plan with a parent or guardian at home.

_____   _____
Student Signature   Date

_____   _____
Parent/Guardian Signature   Date

Step 4: Score Calculation

Your final test score will be an average of your original test and the recovery test.

Final Test Score:_____
